31.08.2023 Krakow

Open competition for technical research assistant in the Molecular Mechanisms of Disease Group

We are looking for an enthusiastic scientist to join our group who will be engaged in the ongoing Sonata-bis project "Molecular background of microvascular complications in *HNF1A*-MODY patients: induced pluripotent stem cells as disease modeling tool". The selected candidate will join the group headed by Dr hab. Neli Kachamakova-Trojanowska, at Malopolska Centre of Biotechnology in Krakow, Poland and would have the possibility to gain experience in various cell and molecular techniques.

What do we expect:

- Bachelor or Master's degree in molecular biology or similar (biology, biochemistry, medical biology);
- ✓ Sterile cell culture techniques; basic molecular biology techniques; Western blot.
- ✓ Advantageous: experience with gene editing techniques, FACS and/or imaging techniques; endothelial cell biology.
- ✓ Good command of spoken and written English;
- ✓ knowledge and ability to use computer software;
- ✓ ability to cooperate, diligence, scientific activity;
- ✓ willingness to learn and apply new research techniques.

What do we offer:

- Work in young, dynamic and strong team with many possibilities to learn new skills;
- Additional health-care packages, Multisport card, social benefits;
- > The position is full-time and is available for 2 years.

Documents:

If you are interested in this position please send your CV and motivation letter to <u>neli.kachamakova-trojanowska@uj.edu.pl.</u>

The documents should be sent before 10th of September. Only the selected candidates will be contacted for an interview.
